Mechanical Engineer – Product Development

Full-time | On-site – Detroit, MI | \$68,000 – \$85,000 / yr

About Meridian Industrial Group

Meridian Industrial Group is a Tier 1 automotive supplier headquartered in Detroit with manufacturing facilities across the Midwest. For over 40 years, we have delivered precision-engineered powertrain and chassis components to OEM partners including Ford, GM, and Chrysler. With 2,400 employees and \$1.1B in annual revenue, we are investing heavily in next-generation lightweight materials and advanced manufacturing processes to meet 2020 CAFE fuel economy standards.

Position Summary

We are seeking a motivated Mechanical Engineer to join our Product Development team. Reporting to the Senior Engineering Manager, you will support the design, analysis, and validation of stamped steel and aluminum structural components from concept through production release. This is an excellent opportunity for an engineer with 2–5 years of experience to take ownership of components and grow within a collaborative, fast-paced engineering environment.

Key Responsibilities

- Develop and release 3D CAD models and 2D engineering drawings using CATIA V5 or SolidWorks
 - Perform structural and thermal FEA analysis using ANSYS or Abaqus to validate designs against customer and regulatory specifications
 - Collaborate with manufacturing engineering and tooling teams to ensure designs are optimized for stamping, welding, and assembly processes
 - Support DFMEA, DVP&R, and PPAP documentation in accordance with IATF 16949 quality standards
 - Conduct tolerance stack-up analysis and GD&T; review of component drawings
 - Participate in design reviews, prototype builds, and physical test validation at our Warren, MI test facility
 - Interface directly with OEM customer engineering teams during program milestones (SOP target: MY2019)
-

Required Qualifications

- B.S. in Mechanical Engineering from an accredited university (M.S. a plus)

- 2–5 years of experience in product or manufacturing engineering, preferably in automotive or heavy equipment
 - Proficiency in CATIA V5 or SolidWorks for 3D modeling and detailing
 - Working knowledge of FEA tools (ANSYS, Nastran, or equivalent)
 - Solid understanding of GD&T; (ASME Y14.5-2009) and mechanical drawing standards
 - Familiarity with APQP/PPAP processes and DFMEA methodology
 - Strong analytical and problem-solving skills with attention to detail
 - Ability to travel occasionally to supplier and customer sites (up to 15%)
-

Preferred Qualifications

- Experience with aluminum or advanced high-strength steel (AHSS) stamped structures
 - Knowledge of NVH requirements and modal analysis techniques
 - Exposure to Six Sigma or lean manufacturing principles (Green Belt a plus)
 - Familiarity with PLM systems such as Teamcenter or Windchill
-

What We Offer

- Competitive salary with annual merit increases and performance bonus
 - Full benefits package: medical, dental, vision, and life insurance
 - 401(k) plan with company match up to 4% of base salary
 - Tuition assistance up to \$5,250/yr for job-related coursework
-

How to Apply

Please submit your resume and unofficial transcripts through our careers portal at www.meridianig.com/careers — Requisition #MIG-2016-0347. Applications will be reviewed on a rolling basis; early submission is encouraged.

Meridian Industrial Group is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, or protected veteran status.
